Simply Dynamics NAV

“Pebblestone Fashion: Powered By Microsoft Dynamics Nav”

Microsoft Dynamics NAV is a highly successful business management solution for small, medium and large sized businesses encompassing financial administration, fixed assets, CRM, supply chain, logistics, service management, warehouse management and production, in a single integrated environment.

Pebblestone Fashion® enriches the Microsoft Dynamics NAV solution and is the perfect fit for organisations in apparel, footwear, sporting goods and accessories in production, wholesale or retail.

Pebblestone Fashion has been developed around the most current worldwide version of the Microsoft Dynamics NAV platform adhering to the necessary legal requirements and those specific requirements of the fashion industry. It has the same recognisable look and feel to Microsoft Dynamics NAV, making it a solution that has a familiar environment for end-users.

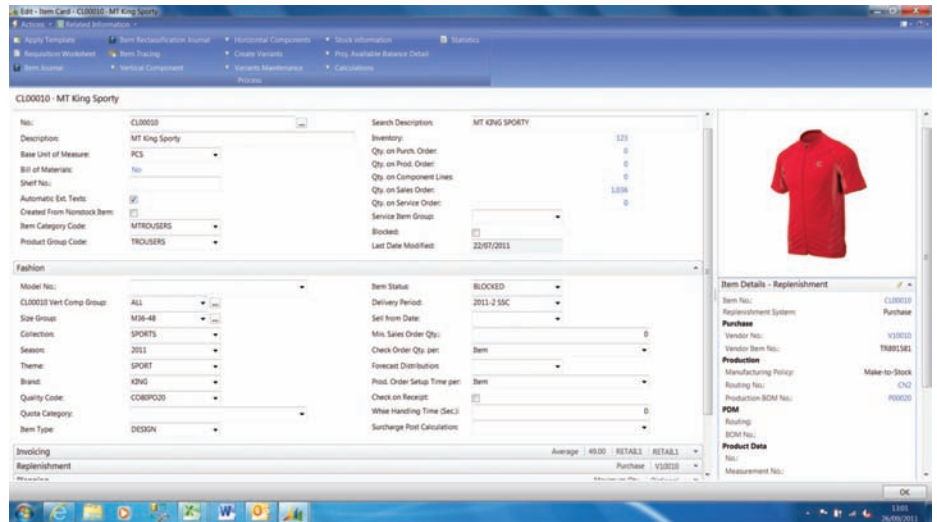

Pebblestone Fashion is available in multiple languages including, English, Dutch, French, German, Italian, Spanish, Portuguese, Lithuanian, Romanian, Bulgarian, Japanese and Chinese and has

been sold and implemented in as many countries.

Fashion companies are working with items that come in many variants, including colour, size, fabrics, designs and multiple size dimensions which makes it a very laborious task to enter, maintain and view basic item information such as SKU-information, sales and purchase costs, bill of materials, technical specifications and order information. Pebblestone Fashion takes away this headache and has a very flexible matrix functionality, both in standard two-dimensional and in a more advanced multi-dimensional matrix form.

Pebblestone Fashion encompasses an advanced and modular software suite including:

- Wholesale/Distribution
- Manufacturing
- Buying groups
- Remote Sales
- Intercompany
- Advanced Forecasting
- Sales target and analysis
- Vendor rating
- Logistic Service Providers
- PDM (Product Data Management)
- Surcharge posting
- Letter of Credit
- Extended calculations
- Box logistics
- Consignment
- FastReact interface
- Traffic
- Queue posting
- EDI Fashion United
- Commission
- Product Lifecycle Management
- Advanced Prepack
- Value Added Services
- Corporate Wear
- Corporate Wear Entitlements

This functionality is extended throughout the entire solution, from sales through to purchasing, logistics and production.

A characteristic feature of the fashion industry is the pre-sales process. Pebblestone Fashion has all of the essential pre-sales functionality within the system and the business processes covered include; planning, design,

sourcing, purchasing, logistics, warehousing and financial administration. Preserving historic orders, tracking and recording back-orders, including their origins, entering sales order targets and viewing the daily progress of pre-sales are just a few more examples of the rich functionality within the Pebblestone Fashion system.

“Certified for Dynamics NAV”, Pebblestone Fashion® complies to the highest Microsoft standards and the strictest stringent quality requirements”

Simply Dynamics NAV
